What nuclear energy can do for the planet right now.

The proven AP1000® technology with passive safety features. The eVinci™ microreactor with cutting-edge technology for remote communities. Our advanced fuel portfolio includes innovations to meet all type of reactor needs. Turnkey nuclear plant operations to maximize safety, performance and longevity. The world leader in decommissioning with unparalleled expertise restoring landscapes.

The transformation of today's nuclear industry shows exponential progress in our current status as a clean, safe, reliable and carbon-free energy source.

Meeting the growing demands for **clean energy**.
Today's solution for **Shaping Tomorrow's Energy**.
