

COLLABORATIVE SOLUTIONS FOR YOUR MOST IMPORTANT CHALLENGES

WESTINGHOUSE ELECTRIC COMPANY, LLC

Collaborative innovation—Westinghouse’s foundation for incredible technological breakthroughs for more than 130 years.

Our globally recognized team of technical experts works in collaboration with colleagues from universities and government labs across the world. Together we innovate, develop, test and refine engineering solutions that solve some of the most complex technical challenges of the nuclear industry.

But these solutions are not found in isolation. Our most important collaborators are our customers. It’s only through our customers that we can fully understand the unique and changing challenges utilities face. And it’s only through our customers that we can collectively create the best solutions.

We are committed to working together with you to shape the future of nuclear. Learn more about our pursuit of technical excellence and innovation at <http://www.westinghousenuclear.com/About/Innovation>.

A PARTNER AND A PROMISE FOR THE LONG RUN

At Westinghouse we listen, understand, innovate and deliver. We drive to make our customers successful by keeping nuclear power plants running safely, efficiently and economically. We are the trusted partner with the experience, insight and global reach needed to drive reliable performance, customer-focused value and cutting-edge innovation. We offer more than just a commitment—we provide a promise for the long run.
