

Pioneer of Passive Fire Protection for the Nuclear Industry – Now Also the Answer to Your Flood Mitigation Issues

For over 30 years PCI Promatec® has offered an unmatched library of products and designs qualified to meet the unique requirements of the nuclear industry, including high temperature, pipe movement, and radiation resistance/attenuation sealants and systems. We also continue to offer formulas and systems from Brand/Bisco, ICMS and Techsil, simplifying compliance with your plant's specifications.

As a result of the unfortunate events of Fukushima, we have worked with a number of utilities to develop thin-profile coatings which can be installed over existing seals, vastly improving their resistance to flood. These coatings are easily removable, radiation resistant, fire tested and compatible with Hypalon™ and Firewall III cable. Additionally, as the exclusive worldwide distributor of 3M

products to the nuclear industry, we have qualified 1-3 hour electrical raceway fire barrier systems that fully comply with the latest USNRC requirements. These systems have been qualified to the more rigid seismic and LOCA conditions resulting from the Fukushima incident.

Most recently, our NQA-1 Quality Assurance program has passed the rigorous audit process of the DOE and has continued to meet the requirements of NUPIC every year since its inception.

Our Target Zero safety program is one of the best in the industry. Our EMR is one of the lowest in the country. As part of Performance Contracting Group (PCG), we offer the resources and financial stability of "one of the Top 10 Specialty Contracting Firms in the USA," as ranked by *ENR Magazine*.

Our customer base includes the vast majority of nuclear plant owners in the USA, DOE, and a number of international utilities in Asia and Europe. In an average year, we do business with over 50 facilities worldwide with services ranging from technical support to full turnkey contracts. Our products are installed at 74 sites within the United States and 119 worldwide. With contracts successfully completed from \$1,000 to \$20,000,000, no job is too large or too small.

If you have a need, we have a solution. For more information or technical support, call PCI Promatec at 281-807-3318, email us at info@promatec.com or visit us online at www.promatec.com.

The Leader In Passive Fire Protection Is Now Also Your Flood Mitigation Source

PCI PROMATEC®, THE LEADER IN PASSIVE FIRE PROTECTION PRODUCTS AND SERVICES FOR OVER 30 YEARS, HAS DEVELOPED A NEW FLOOD MITIGATION SEAL MATERIAL WITH THE FOLLOWING CHARACTERISTICS:

- APPLIED OVER EXISTING SEAL
- THIN PROFILE – 3/16"
- FIRE TESTED – IMPROVES FIRE RESISTANCE OF EXISTING SEAL
- NEUTRAL CURE – NO HYDROGEN OFF-GASSING
- COMPATIBLE WITH HYPALON™ AND FIREWALL III CABLE
- EASILY REMOVABLE
- LOW HALOGEN – NO LOW MELTING POINT ALLOYS
- RADIATION RESISTANT
