Big science. 
Big opportunities.

Oak Ridge National Laboratory is tackling the toughest questions in nuclear science and engineering—producing isotopes more efficiently, making fusion energy a reality, and designing the next generation of nuclear reactors.

To continue delivering groundbreaking science, ORNL’s team is growing. Learn more at jobs.ornl.gov and find current opportunities in:

- Fission and fusion technologies
- Modeling and simulation
- Isotope research, development, and production
- Nuclear security

ORNL is seeking applicants for various roles across its nuclear science programs.

- Strategic Scientific Lead, Radioisotopes
- Computational Plasma Physicist
- Nuclear Reactor Analyst
