

**“Now with our  
expanded I&C line,  
we’re ready to take  
on the upgrade  
challenge.”**

— Clayton Scott,  
Sr. Vice President,  
Global I&C

## **Together, writing stories of success.**

A utility’s workstations needed an upgrade, but custom hardware and a tight schedule added pressure. Our newly-acquired team from Schneider Electric’s nuclear I&C business meant we had experts ready to take on the job.

We worked differently to stay on schedule and installed a custom, expandable Foxboro DCS system with unique modifications to hardware and software. This approach reduced testing issues, met the timeline and even improved a control that had been variable for years.
