

“We now deliver a full range of I&C solutions for the safe and reliable operation of nuclear power plants worldwide.”

— Clayton Scott
Sr. Vice President
Global I&C

Together, writing stories of success.

Our industry needed a trusted supplier with reputable instrumentation and control (I&C) platforms. Last year, we acquired the I&C business from Schneider Electric to strengthen our position as the global leader in nuclear automation.

We now have close to 1,400 I&C professionals with decades of experience. Our team has installed more than 80 safety I&C systems on 44 reactors in 17 countries and more than 250 automation systems were previously installed by Schneider Electric.

With an expanded I&C portfolio, more experienced people, and Spec 200 manufacturing moving to the U.S., you get I&C solutions from a trusted partner.
