

**“We’ve developed the industry’s most thorough solutions to address thermal sleeve wear to extend the operating life of plants worldwide.”**

— Curtis Van Cleve,  
Vice President, Component  
Repair and Replacement

**Together, writing stories of success.**

Industry events have revealed thermal sleeve wear issues from flow-induced vibration. Framatome has examined, repaired or replaced more than 20 thermal sleeves in plants globally, and our technology has been chosen by the largest utility in the world. Now utilities can manage thermal sleeve wear with tailored solutions that allow shorter, more predictable outages and reduced maintenance cost.

Our international collaboration, innovative tooling and preventative options provide inspection, mitigation and repair solutions for plant operators. We consistently develop innovative, efficient strategies for extending plant operating life.

**Your performance**  
is **our** everyday **commitment**
