

# Preventative Care for Your Steam Generator

An annual doctor's exam can keep you in tip-top shape. One of Framatome's steam generator (SG) wellness checks can do the same for your plant.

Whether it's the more extensive MAESTRO evaluation every five years, or the yearly SG Health Assessment, you can depend on both for deposit data analysis and trends that allow for

optimized maintenance routines and mitigation strategies like our Deposit Minimization Treatment.

Schedule a SG checkup today to protect your assets, extend operating life and improve your plant's performance.

**Count on it.**
