

Structural Integrity Associates, Inc.®

EMERGENT
OUTAGE

ISSUES

Structural Integrity's dedicated outage response teams are available to assist with emergent issues that arise during a plant outage. Our team of experts are backed by our 30+ years of nuclear power plant experience helping resolve problems that otherwise derail outages. Structural Integrity's value is helping power plant owners save time and money on issues that are difficult to solve and require the responsiveness and experience that we uniquely provide. We routinely provide outage expertise in the following areas:

- Operability Evaluations
- Flaw Tolerance Analysis
- Repair/Replacement Design and Relief Requests
- Welding, Materials and Fabrication
- Vibration Monitoring and Analysis
- NDE Support
- Third-Party Reviews
- Failure Analysis/Root Cause Analysis
- Water/Reactor Chemistry
- Radiation Source Term
- Fuel Failures
- Electrical Equipment/EQ
