

The Global Leader in Rad-Hard Manipulators and Crane Systems

Intelligent Solutions For Nuclear And Hazardous Environments

PaR Systems has been the leader in intelligent solutions for nuclear and hazardous environments for over 55 years. We specialize in adding value through our engineering expertise and proven remote handling technologies, while adding value for our customers' quality, safety and productivity. PaR provides not only a line of rad-hard manipulators, but also specialty crane systems and custom equipment for hazardous environments, nuclear and critical applications such as hot cells, process facilities and decommissioning. We engineer value through technology.
