

SCHOTT ETERNALOC®

Forever young. Maintenance-free for decades.

Time is the truest test of all. Shouldn't the safety and reliability of nuclear components stand up to it? Using proven glass-to-metal sealing technology, SCHOTT Nuclear Electrical Penetration Assemblies last decades longer than polymer-based counterparts. You can truly have the peace of mind to "fit and forget" with these money-saving, 60-year lifetime components that maintain integrity for years to come. **What's your next milestone?**
