

ence as an investment banker at Lehman Brothers and J.P. Morgan.

The NRC has appointed **Thomas G. Ashley Jr.** as the new director of its Office of Investigations. He had

Ashley

been serving as the acting director of this office since February, when the previous director, **Tracy Higgs**, retired. Ashley has been with the NRC since

2020, when he became director of the Information Technology Ser-

vices Development and Operations Division in the Office of the Chief Information Officer. Before joining the NRC, he was director of IT transformation in the Defense Counterintelligence and Security Agency.

Day

Neil Day has been selected by the NRC Region I Office as the new senior resident inspector for Beaver Valley nuclear power plant, in Ship-

pingport, Pa. Day has been with the NRC since 2008, serving in engineering roles and as a resident inspector at the Grand Gulf and Comanche Peak nuclear power plants.

Steward

The NRC Region III Office has named **Jeffery T. Steward** as the senior resident inspector for Constellation Energy's Clinton nuclear power plant, in Illinois.

BIRNS Lumena-6™

See Your Nuclear Facility
in a Different Light

The BIRNS Lumena-6™ LED underwater floodlight provides powerful, high efficiency illumination. Its 85,000 lumen output and >61,000 hour lamp life deliver brilliant, near daylight visibility to reactor and fuel pools, transfer canals and other key applications. Plus, it's certified for use in water temperatures up to 70°C.

This seismically qualified plug-and-play system is precision engineered with a fully integrated water cooled power driver, so no topside equipment is needed. It draws only 600W and operates on any mains supply from 90 to 300VAC, and with its ultra-high efficiency reflectors, provides scalable and highly effective lighting to maximize safety and fuel movement performance.

BIRNS' Quality Management System is
ISO 9001:2015 Certified;
NRC 10CFR50, App. B Compliant
