

YOUR NUCLEAR PARTNER LET'S POWER THE FUTURE TOGETHER

Advanced specifications. New SMR designs. Nickel release. Meeting the most demanding nuclear specifications can be challenging. This is where Sandvik can help. Since 1964 we have supplied over 65 million meters of zirconium nuclear fuel cladding tubes and more than 400 tube bundles for steam generators, the equivalent length of circumnavigating the globe, with zero failures, in over 20 countries. We partner with all major EPCs to meet advanced tube and pipe requirements for all reactor designs. Take advantage of our extensive nuclear portfolio, materials R&D expertise and experience in guiding your team through complex specifications.
