

ANSI/ANS-18.1-2016**Radioactive Source Term for Normal Operation of Light Water Reactors**

Supersedes ANSI/ANS-18.1-1999

This standard provides a set of typical radionuclide concentrations for estimating the radioactivity in the principal fluid systems of light water reactors and for projecting the expected releases of radioactivity from nuclear plants. It is not intended that the values be used as the sole basis for design but be used in environmental reports and elsewhere where expected operating conditions over the life of the plant would be appropriate.

Contact ANS for this standard and for a complete list of standards developed by the ANS Standards Committee.

Print and electronic copies are available in the ANS Store: www.ans.org/store

Neutron Sources**

- NRC-Registered Standard Sources to 3.7 mg.
- Custom Sources
- Quality Sources for Industry, Research & Reactor Start-Up
- Also Available:
SbBe Pellets & Sources
Neutron-Source Shipping Containers - TYPE A - for Rental or Purchase
WEP Shielding
