clearly to develop, design and produce products structured as one of three integral corporate business units, which allows us to focus very activity centering on solenoid operated valves and industrial, and scientific applications. Since 1951, continually expanding. Today, Valcor manufactures environmental/seismic conditions has been for difficult applications with high-pressure, Valcor's involvement with supplying components to the nuclear industry, with most hydraulic fluid applications), or Class 1E air pilot process valves for various fluids (including and manufacturing high quality flow control hydraulic, fuel and pneumatic solenoid valves, both commercial aircraft and space components including naval nuclear, fixed wing, rotary and aircraft and space industries. Applications include APU shut-off valves, pressure and flow regulators, and pressure vessels for military programs and unmanned air including naval nuclear, fixed wing, rotary and

Valcor Engineering Corporation designs and manufactures valves for nuclear, aircraft, space, and international nuclear programs.
