

THE RIGHT PARTNER FOR THE LONG RUN

Zephyr Advanced Acquisition System

For more than 130 years, companies around the world have looked to Westinghouse for practical innovations that solve their most pressing operational challenges. Aligned with the industry priority for cost reduction, Westinghouse has right-sized solutions like Zephyr® steam generator technology that saves nuclear plant operators an average of 22 hours of critical path time and delivers impressive dose and waste reductions. Forward-thinking collaboration with key industry organizations like the Nuclear Utility Obsolescence Group focuses our investment in tomorrow's solutions that preserve a bright future for the nuclear industry. No company is more invested in keeping your plants operating safely, efficiently and economically for the long term.
