

100 YEARS OF HEAVY RIGGING AND TRANSPORT INNOVATION

NUCLEAR DECOMMISSIONING INDUSTRY LEADERS

BIGGE HAS SUCCESSFULLY COMPLETED MORE NUCLEAR UNIT DECOMMISSIONING PROJECTS THAN ANY OTHER HEAVY RIGGING AND TRANSPORTATION CONTRACTOR

Bigge Power Constructors specializes in serving the heavy lift and transportation needs of the nuclear power industry. We are the leader in the use of innovative rigging solutions for nuclear decommissioning or regular outage component replacement projects.

Recent decommissioning projects have included critical rigging and transport scopes at Trojan, Rancho Seco, Connecticut Yankee, Zion, Humboldt, Big Rock, San Onofre and Dairyland Nuclear Stations.

IN ADDITION:

- Talented in-house Engineering Group that is second to none in the industry.
- An Operations staff with decades of field experience in the nuclear rigging arena.
- Specialized equipment uniquely designed for NPP heavy component removal.
- First hand familiarity with the majority of the US nuclear power plants.
- State of the art over-the-road equipment for oversized transport.
