The future of power generation.

Bringing the Industrial Internet and data analytics to the nuclear industry.

Building on GE's Predix platform, GE Hitachi is working to develop solutions to deliver powerful outcomes for nuclear power plants. New applications that are part of GE's Digital Power Plant will incorporate data and analytics to enhance asset performance management, reduce costs and optimize facilities.

See how we're working with utilities like Exelon to lead the digital revolution of the nuclear industry at **nuclear.gepower.com/industrial-internet.**
