

Radiation

monitoring, detection and identification

With decades of radiation monitoring innovation, Thermo Fisher Scientific is the long standing leader for instrumentation designed to protect lives, property and the environment from harmful exposure to radiation. Within our broad solution suite, you'll find precision instruments and software engineered for the sensitivity, reliability and low cost of ownership you're looking for. Whether you require simple, portable measurement instrumentation, large-scale integrated monitoring systems or anything in between, we have you covered. Put our years of experience to work for you.

Proven, Effective and Trusted.
