

To them, it's just another day. No worries.

Build On Our Strength.
So you don't need
to worry either.

MRO projects are vitally important in and adjacent to the safety zone.

Whether it's small and simple or large and complex, Five Star Products high-performance machinery grouts and concrete repair products are an integral component of most MRO projects – from the most demanding safety related applications within the nuclear island, to just about any such use in the remainder of the plant.

Since 1955, Five Star Products, Inc. has been the trusted source for high-performance cementitious and epoxy grout products for the industrial, infrastructure and power industries.

Take the worry out of your MRO projects with these Star-Powered Solutions:

CEMENTITIOUS GROUTS

Five Star® Grout
Five Star® Fluid Grout 100

EPOXY GROUTS

Because you know
Biach, you already
know us.

It has to be Hydratight

Biach, now part of Hydratight, pioneered the first nuclear tensioning system. Today, Hydratight operates in more than half of the world's nuclear plants, including 80% in the USA. As one company, we provide specialized bolted joint integrity products and services that ensure leak-free performance, reliable operation and shorter, more predictable outages. To find out more contact solutions@hydratight.com.
