

Meeting the needs of nuclear power plants **TODAY AND INTO THE FUTURE**

The nuclear power industry demands solutions that deliver high safety performance without fail and provide sustained reliability under rigorous conditions.

Building upon 40 years of nuclear experience, General Cable has combined advanced materials with manufacturing expertise to produce **ULTROL® 60+** Class 1E nuclear-qualified cables.

Third-party tested to meet Generation III reactor requirements, **ULTROL® 60+** cables exceed stringent industry standards and specifications to provide a 60-year-plus service life to optimize nuclear power plant operations *TODAY AND INTO THE FUTURE.*
