

ADZ: A Solutions-Based Approach for Predictable Nuclear Projects

ADZ is a joint venture that combines the world-class capabilities of **AREVA and Day & Zimmermann** to offer comprehensive Engineering, Procurement and Construction (EPC) services to the U.S. nuclear utilities sector. AREVA and Day & Zimmermann have a long-standing, successful history of working together on complex nuclear plant projects that drive efficiencies and increase accountability and predictability while reducing costs. This innovative JV provides the vehicle for both companies to further their commitment to providing integrated, turnkey solutions to the nuclear industry with predictable results.

ADZ offers all of the following:

- BOP Engineering Design and Analysis
- Design Change Packages
- General Construction Management Projects
- Task Management and Craft Labor
- Engineering Field Support
- Specialized Machining, Welding and Precision Measurements
- Radiological, Valve and Condenser Services
- Electrical and I&C Products — Digital Upgrades
- Field Engineering
- Complete Procurement Services
- Work Planning & Packages
- Testing and Turnover

ADZ services include design/procure/build Balance of Plant projects as well as standard plant modifications and maintenance, power uprates, decommissioning, and other large and complex projects and plant upgrades. Committed to the safety and performance of nuclear power plants, ADZ optimizes plant availability and capacity by working with our customers for seamless execution. All dedicated to delivering **Solutions from A to Z.**
