

SAFETY
DONE RIGHT

EVERY RENTAL BEGINS AND ENDS WITH SAFETY

TEST, INSPECT, CERTIFY, RENT, REPEAT

At LGH, no equipment leaves our rental centers before being completely broken down, inspected and repaired, tested and certified. Using vertical and horizontal proof test machines, tried and true processes for each piece of equipment and continual training with each of our certified and experienced technicians, we put all of our equipment to the ultimate test to ensure the safety of your crew before it ever leaves our facility. With 23 North American Rental Centers, the gear you need is just a phone call away.
