

# Does safety control obsolescence keep you up at night?

**CONSOLIDATED  
CONTROLS**  
NUCLEAR POWER PLANT I&C SOLUTIONS

If you are relying on outdated systems, DRS Technologies offers a variety of Consolidated Controls solutions for improving older commercial nuclear safety systems. Our upgrades range from open-architecture PLC designs for non-safety applications, to customized analog and digital systems for safety related applications. We have the capability to re-engineer legacy equipment to provide a form, fit, and function replacement so that your final system meets or exceeds original design basis criteria.

At DRS we provide obsolescence management solutions and services backed by our decades of Consolidated Controls experience that follow NRC and EPRI commercial grade dedication guidelines. To reduce surveillance time we incorporate enhanced diagnostic capabilities when possible providing a cost savings to you; helping to fulfill the industry's "Nuclear Promise".

If obsolescence concerns are keeping you up at night, more restful sleep is possible by putting our Consolidated Controls safety system upgrades and obsolescence management solutions to work for you.
