

APTIM

NUCLEAR SERVICES

The culmination of 30+ years of experience enables our Power team to deliver safe, first-time quality, innovative solutions to our customers with nuclear, fossil fuel, and/or renewable power generation assets.

As your partner, we are focused on understanding the key drivers of your business so we can customize our offering to best enable your success. Our maintenance, modification, and construction (MMC) services, coupled with welding and valve maintenance specialty services, allow us to deliver innovative approaches to outage management and execution, equipment reliability, sustainability, and plant life cycle needs.

Expect the Extraordinary.
