

Connect with Your Industry

PHOENIX, AZ | MARCH 8 - 12, 2020

Join us at WM2020, the premier international conference for management of radioactive material and related topics. Connect with over 900 different organizations and 2,400 radwaste management professionals from more than 35 countries around the world. Experience hundreds of technical presentations, a comprehensive exhibition, and opportunities to network with a wide spectrum of industry leaders all in one place.

The industry's largest annual exhibition showcases all aspects of products and services related to the nuclear radwaste industry including robotic handling, emerging technologies, transportation, waste storage, and much more.

> Exhibitor and Attendee Registration is Open

WMS provides a preeminent technical forum for discussion and seeking safe, environmentally responsible, technically sound and cost-effective solutions to the management and disposition of radioactive waste. If you are interested in presenting at WM2020 please submit a 400 - 800 word abstract at wmsym.org to be considered as a presenter.

THEME

Reducing Long-Term Environmental Liability Through Efficient, Effective Clean-Up

FEATURING

US DOE Savannah River Site

March 10, 2020

West Valley Demonstration Project

March 11, 2020

Portsmouth Paducah Project Office

March 12, 2020

Connecting Young Professionals to Our Industry

WMS and the Roy G. Post Foundation continue to successfully connect the best and brightest students with leading companies in the nuclear industry.

WMS has been increasing its efforts to interest students in a career in the radwaste and energy industries. Following WM2019, Longenecker & Associates, a generous Post Foundation sponsor, hired 2019 scholarship recipient and recent graduate of North Carolina State University, Ashley Meyer, into its newly established engineering apprenticeship program. "Securing and supporting the next generation of leaders in our industry is a core value of our company," L&A President John Longenecker said.

WMS and the Post Foundation hope to see this effort continue as the next generation leads the industry forward.

Students interested in applying for a scholarship can learn more at wmsym.org.

\$4M

Amount over the past 16 years, the Post Foundation has given to more than 150 undergraduate and graduate students from all over the world.
