ENVIRONMENTAL MODELING MADE EASIER

IT'S EASY TO GET LOST in the technical details related to the remediation, transport, storage and disposal of radioactive waste. That's why agencies and companies around the world rely on GoldSim software to give them the big picture view of their radioactive waste challenges.

ONLY GOLDSIM PROVIDES:

- The world's most powerful and user-friendly platform for contaminant transport, performance and safety assessment modeling to support the remediation of existing radioactive waste sites and the design and licensing of disposal facilities
- The ability to update your model and view the results in minutes using a convenient PC-based platform
- A user-friendly framework that can integrate and simplify your existing models

Visit www.goldsim.com/radwaste to learn how GoldSim is being used to support radioactive waste management programs worldwide.
