Bringing creative solutions to complex challenges

Connecting our remediation professionals to your most complex contamination challenges can connect you to the most cost-effective, regulatory compliant solutions.

Our innovative Orion ScanSort[SM] provides rapid, accurate radioactive soil assay and sorting using advanced radiation detection/measurement technology to process up to 300 tons of soil per hour. This process, accepted by the US Nuclear Regulatory Commission and US Environmental Protection Agency, has proven to reduce radioactive waste volumes and compress project schedules, resulting in significant cost savings for our customers.
