

2011 Utility Working Conference & Vendor Technology Expo

August 14-17, 2011 ■ Westin Diplomat ■ Hollywood, Florida

“It’s Not Easy Being Green:

Innovations for Continued Safe, Secure, and Competitive Nuclear Operation”

Please join us at the 2011 American Nuclear Society’s Utility Working Conference dedicated to identifying innovations in all areas of nuclear power plant operations. The functional area tracks/sessions bring together professionals with different perspectives focusing on current issues and innovations.

Utility Working Conference Moving to Hollywood

In 1994, a small but determined group of leaders within the Operations and Power Division of the American Nuclear Society (ANS) conducted the first Utility Working Conference (UWC) in answer to the following questions:

1. How can the combined perspectives of various utility leaders be focused onto the most immediate needs and most challenging issues currently facing the ever-changing nuclear industry?
2. How can the collected insights from a broad cross section of nuclear experts be shared in frank and timely dialog without the burden of formal presentations or unnecessary organizational barriers?
3. How can pertinent information about significant achievements and successes be effectively disseminated to others having similar requirements and resource limitations?
4. What mode of communication most efficiently satisfies all these objectives in a venue conducive to working, sharing and learning?

The result was a small conference attended by fewer than 200 that many quickly recognized to be a powerful venue for sharing expertise, experience and learning.

Since that first small conference in Amelia Island, FL, the UWC has grown into a major industry meeting. Well over 600 industry professionals attended the 2010 conference with 88 vendors exhibits in the Technology Expo. To accommodate this growth, the UWC is changing locations to the Westin Diplomat in Hollywood Florida. This move is allowing us to add functional area tracks for breakout sessions and expand the Technology Expo. We on the organizing committee are excited about the move and hope you will join us for the most comprehensive conference available to nuclear power professionals.

2011 UWC Tracks

Executive
Engineering
Knowledge Management and Workforce Issues
Operations
Regulatory Relations and Oversight
Performance Improvement
Risk Management
Work/Project Management
Long Term Operation
Maintenance
New Reactors
Cyber Security/Digital I&C

Meeting Information www.ans.org
