

Technology of Fusion Energy (TOFE 2020)

April 20-23, 2020 * Charleston Marriott * Charleston, SC, USA

The 24th Topical Meeting of Fusion Energy on the technology of fusion energy, continues the long tradition of technical exchange forums covering all topics on fusion energy. The objective of TOFE 2020 is to provide a forum to highlight the latest engineering and scientific advances in both inertial and magnetic confinement fusion, support system development, and power conversion. TOFE 2020 is intended to attract not only veteran fusion experts, but also scientists, engineers and students new to the field.

Why Should My Organization Sponsor or Exhibit?

TOFE 2020 is the latest in a biennial conference series that is attended by decision-makers, project managers, scientists, engineers, students and educators from throughout the world who are engaged in one or more topical areas associated with fusion. By sponsoring or exhibiting at this conference, you will have the opportunity to network with leaders in the fusion field, as well as discuss your products, services, and organization.

Who Attends?

Around 200 researchers, scientists, students and proponents of the advancement of fusion energy from around the world are anticipated to attend. With over 150 oral and poster presentations anticipated, coupled with one-of-a-kind panel sessions scheduled over a four-day period, you cannot afford to miss this unique chance to showcase your organization.

Who Hosts or Exhibits?

Companies and organizations showcase products and services related to fusion science and technology. Areas of interest include these important topical areas:

- Fusion Next Steps
- Nuclear Analysis and Validation
- First Wall and Divertor Plasma Facing Component and HHF Technology
- Magnets
- Remote Maintenance
- Tritium Fuel Cycle
- Fusion Materials Science and Development
- Neutronics
- Fusion Safety, Environment, and Accident Scenarios
- Breeding Blankets, Solid and Liquid Breeders
- Licensing, Design Codes, Regulatory Structures
- Critical Fusion Enabling Technologies
- Advanced manufacturing
- Plasma Interface Issues
- IFE Technology and Concepts
