

ANS

Mission

The American Nuclear Society provides its members with opportunities for professional development, serves the nuclear community by creating a forum for sharing information and advancements in technology, and engages the public and policymakers through communication outreach.

Nuclear Energy Blogger Carnival 197

Posted on [February 24, 2014](#) | [Leave a comment](#)

The 197th Carnival of Nuclear Energy Bloggers and Authors has been posted at The Hiroshima Syndrome. [You can click here to access this latest installment](#) of a long running tradition among the top English language pro-nuclear bloggers and authors.

Each week, a new edition of the Carnival is hosted at one of the top English-language

nuclear blogs. This rotating feature of nuclear “posts of the week” represents the dedication of those who are working toward a future of energy abundance, improved health, and broadened security through nuclear science and technology.

Inform. Engage. Inspire.

As an initiative of the American Nuclear Society (ANS), the Center for Nuclear Science and Technology Information was conceived to increase understanding of the basic science of the atomic nucleus. Our focus is on the principles of nuclear science and technology, and how brilliant people are employing these principles to improve the human condition. Our goal is to change the conversation about nuclear.

Rewarding & CHALLENGING & Exciting

Major applications of nuclear science and technology include:

- Archaeology and paleontology
- Art appraisal and authentication
- Crime investigation
- Energy
- Environment
- Homeland Security
- Medical Science
- Science education
- Research

These are exciting times for professionals in the nuclear science and technology field. New discoveries allow researchers and technicians

“Nuclear engineering really is the intersection of policy and technology. I get to work with scientists, policymakers, and international partners to mitigate
