TOUGH2 SYMPOSIUM

315  Foreword: Special Issue on the 2009 TOUGH2 Symposium / George J. Moridis

TECHNICAL NOTE

317  Estimation of Humidity During Tunnel Ventilation—Supported by TOUGH2 Calculations of Liquid, Vapor, and Heat Transport / Joachim Poppei, Gerhard Mayer, Nicolas Hubschwerlen, Guillaume Pépin, Jacques Wendling

TECHNICAL PAPERS

327  Natural Convection in Tunnels at Yucca Mountain and Impact on Drift Seepage / N. Halecky, J. Birkholzer, P. Peterson

342  Chemical Evolution of Bentonite Buffer in a Final Repository of Spent Nuclear Fuel During the Thermal Phase / Aku Itälä, Markus Olin

353  Simulation of Gas Transfer at the Scale of a Disposal Cell in the Context of High-Level and Long-Lived Radwaste Disposal in a Deep Clay Formation During the Operating Phase / E. Treille, J. Wendling, F. Plas

375  A Turbulent Transport Network Model in MULTIFLUX Coupled with TOUGH2 / G. Danko, D. Bahrami, J. Birkholzer

401  Thermohydraulic Analysis of Gas Generation in a Disposal Facility for Vitrified High-Level Radioactive Waste in Boom Clay / Janez Perko, Eef Weetjens

438  Bentonite Alteration Due to Thermal-Hydro-Chemical Processes During the Early Thermal Period in a Nuclear Waste Repository / Tianfu Xu, Rainer Senger, Stefan Finsterle

452  Injection of Nuclear Rocket Exhaust and Water into a Deep Unsaturated Zone / Clay A. Cooper, David L. Decker
