## TECHNICAL PAPERS

127  
Asymptotic Wielandt Method and Superhistory Method for Source Convergence in Monte Carlo Criticality Calculation  
Ding She, Kan Wang, Ganglin Yu

138  
Calculating the Second Eigenpair in Criticality Calculations Using the Monte Carlo Method with Source Points Pairing as an Efficient Net-Weight (Cancellation) Algorithm  
Bo Shi, Bojan Petrovic

151  
A Monte Carlo Code for Radiation Damage by Neutrons  
V. Kumar, Nagendra Singh Raghaw, H. S. Palsania

164  
Zero Variance Penalty Model for the Generation of Covariance Matrices in Integral Data Assimilation Problems  
G. Noguere, P. Archier, C. De Saint Jean, B. Habert

180  
Uncertainty Quantification for New Approaches to Spent Fuel Assay  

193  
Explicit Flux Autocorrelation Dependence on Dominance Ratio in Monte Carlo Criticality Calculations of Large Cores  
Sergey S. Gorodkov

202  
Dispersion Properties of B4C Microparticles as Emergency Neutron Absorbers in Spent-Fuel Pool Water  
You-Jin Jung, Jaesik Hwang, Jei-Won Yeon, Bong Hyun Boo, Kyuseok Song

208  
Fluctuations of Mass Yield Distribution for the Epithermal Fission of $^{235}\text{U}$ and Its Impact on HCLWR Calculations  
P. Leconte, J.-P. Hudelot, M. Antony

## TECHNICAL NOTE

216  
A Parallel Krylov-Based Adjoint Sensitivity Analysis Procedure  
R. T. Evans, D. G. Cacuci
