Fusion Science and Technology

CONTENTS / JANUARY 2014—VOL. 65, NO. 1

SPECIAL ISSUE

SIXTH ITER INTERNATIONAL SCHOOL (IIS2012)
RF Heating and Current Drives in Plasmas

December 2–6, 2012
Ahmedabad, India

iii Preface / Abhijit Sen

LECTURES

1 Methods of Radio-Frequency Current Drive / N. J. Fisch

10 Physics of Landau Resonances, Cyclotron Resonances, and Current Generation / J. M. Rax

43 Characteristics of Waves in Plasmas and ICRF Heating / Ryuhei Kumazawa

54 On Variational Methods in the Physics of Plasma Waves / I. Y. Dodin

79 Some Unsolved Challenges in Radio-Frequency Heating and Current Drive / N. J. Fisch

103 Advances in LHCD System for SST-1 Tokamak / P. K. Sharma

129 Electron Cyclotron Power Source System for ITER / S. L. Rao, Anjali Sharma, Mahesh Kushwah, Parth Kalaria, Tarun Kumar Sharma, Vipal Rathod, Ronak Shah, Deepak Mandge, Gaurav Joshi

145 ECRH Systems on Tokamaks SST-1 and Aditya / B. K. Shukla

(Continued)
TECHNICAL NOTE

154 Self-Consistent Simulations of ICRH with the Background Equilibrium in Tokamaks and Stellarators / W. A. Cooper, M. Jucker, J. P. Graves

APPENDICES

APPENDIX A—EXTENDED ABSTRACTS

157 Fully Noninductive Scenarios: Fast Case Modeling / Giuseppe Calabro

158 Physics and Applications of High-Power Electron Cyclotron Waves In Fusion Plasmas / Ronald Prater

159 Electron Cyclotron Heating and Current Drive Technology / Keishi Sakamato

161 Kinetic Integrated Modeling of Heating and Current Drive in Tokamak Plasmas / Atsushi Fukuyama

162 Physics and Technology of Lower Hybrid Current Drive in Tokamaks / G. T. Hoang

164 Introduction to the Physics and Technology of Radio-Frequency Heating and Current Drive / J.-M. Noterdaeme

166 Electron Bernstein Waves in Magnetic Fusion Plasmas / Martin O'Brien

APPENDIX B

168 Sixth ITER International School (IIS2012) Participants
