

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 177, NUMBER 3, JULY 2014

## CONTENTS

### TECHNICAL PAPERS

- 233** A Point Kinetics Model of the Medical Isotope Production Reactor Including the Effects of Boiling  
*C. M. Cooling, M. M. R. Williams, E. T. Nygaard, M. D. Eaton*
- 260** Control Rod Depletion in Sodium-Cooled Fast Reactor: Models and Impact on Reactivity Control  
*David Blanchet, Bruno Fontaine*
- 275** Validation Study of Pin Heat Transfer for UO<sub>2</sub> Fuel Based on the IFA-432 Experiments  
*Aaron M. Phillippe, James E. Banfield, Kevin T. Clarno, Larry J. Ott, Bobby Philip, Mark A. Berrill, Rahul S. Sampath, Srikanth Allu, Steven P. Hamilton*
- 291** Inventory Simulations Under Neutron Irradiation: Visualization Techniques as an Aid to Materials Design  
*M. R. Gilbert, L. W. Packer, J.-Ch. Sublet, R. A. Forrest*
- 307** Smoothing and Time Series Modeling of Nuclear Material Accounting Data for Protracted Diversion Detection  
*Tom Burr, Michael S. Hamada*
- 321** UO<sub>2</sub> Versus MOX: Propagated Nuclear Data Uncertainty for  $k_{eff}$ , with Burnup  
*Petter Helgesson, Dimitri Rochman, Henrik Sjöstrand, Erwin Alhassan, Arjan Koning*
- 337** Efficient Use of Monte Carlo: Uncertainty Propagation  
*D. Rochman, W. Zwermann, S. C. van der Marck, A. J. Koning, H. Sjöstrand, P. Helgesson, B. Krzykacz-Hausmann*
- 350** High-Dimensional Model Representations for the Neutron Transport Equation  
*Zhengzheng Hu, Ralph C. Smith, Jeffrey Willert, C. T. Kelley*

### TECHNICAL NOTE

- 361** Analysis of Example Problems for Monte Carlo Surface Flux Tallies  
*Jeffrey A. Favorite*

(Continued)

VOLUME 177, NUMBER 3, JULY 2014

## **CONTENTS**

(Continued)

### **LETTER TO THE EDITOR**

- 367** Some Important Fuel Chemistry Aspects Related to the Use of MOX as a Fast Reactor Fuel *R. Viswanathan*
- 373** **VOLUME 177 AUTHOR AND SUBJECT INDEXES**
