

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 146, NUMBER 2, FEBRUARY 2004

CONTENTS

TECHNICAL PAPERS

- 121 Variational Variance Reduction for Monte Carlo Eigenvalue and Eigenfunction Problems *Jeffery D. Densmore, Edward W. Larsen*
- 141 An Integral Form of the Variational Nodal Method *M. A. Smith, G. Palmiotti, E. E. Lewis, N. Tsoulfanidis*
- 152 Conditions for a Minimum Critical Mass in a Nuclear Reactor and Considerations on Goertzel's Theorem in Transport Theory *M. M. R. Williams*
- 176 A Hybrid Nodal Diffusion/ SP_3 Method Using One-Node Coarse-Mesh Finite Difference Formulation *Chang-Ho Lee, Thomas J. Downar*
- 188 Benchmarking MCNP and WIMS/RFSP Against Measurement Data—I: Deuterium Critical Assembly *Hangbok Choi, Gyuhong Roh*
- 200 Measurement of Differential Thick-Target Neutron Yields of C, Al, Ta, $W(p, xn)$ Reactions for 50-MeV Protons *T. Aoki, M. Baba, S. Yonai, N. Kawata, M. Hagiwara, T. Miura, T. Nakamura*
- 209 Neutron Capture Cross-Section Measurement of ^{99}Tc by Linac Time-of-Flight Method and the Resonance Analysis *Katsuhei Kobayashi, Samyol Lee, Shuji Yamamoto, Toshihiko Kawano*
- 221 Calculation of the Complete Sets of Nuclear Data for $n + ^{92,94,96}\text{Mo}$ below 20 MeV *Chonghai Cai*
- 237 Investigation of the Outgoing Tritons Angular Distribution in the $^9\text{Be}(n, t_1 \gamma)^7\text{Li}^*$ Reaction at 14.9 MeV by the Line Shape Analysis of the 0.4776-MeV Gamma Transition *Hongyu Zhou, Ping Wang, Hai Song, Fucai Wu, Fuguo Deng, Ming Hua, Yiming Yan, A. A. Pasternak*

TECHNICAL NOTES

- 245 Accurate Relations Between the Neutron Current Densities and the Neutron Fluxes *Yigal Ronen*
- 248 BOT3P—Bologna Transport Analysis Pre-Post-Processors Version 3.0 *Roberto Orsi*
