

Fusion Science and Technology

CONTENTS / JULY 2009—VOL. 56, NO. 1

Proceedings of the
**EIGHTEENTH TOPICAL MEETING ON
THE TECHNOLOGY OF FUSION ENERGY
(Part 1)**

**San Francisco, California
September 28–October 2, 2008**

vii Preface: Eighteenth Topical Meeting on the Technology of Fusion Energy /
Wayne Meier, Jeff Latkowski

FUSION TECHNOLOGY PLENARY

- 3 ITER European Activities / *Gianfranco Federici*
- 13 Overview of Activities by the U.S. Domestic Agency / *Ned Sauthoff*
- 20 Procurement Preparation of ITER Key Components by JADA / *Ryuji Yoshino*

ITER

- 31 AINA Safety Code, A Review of Loss of Plasma Control Transients in ITER:
Sudden Increase in Fuelling Rate, Sudden Increase of Auxiliary Heating /
J. Dies et al.
- 38 Assessment of the Qualification Test of the First Wall Qualification Mockup /
R. M. Hunt, M. Narula, M. A. Ulrickson, T. T. Martin, A. Ying
- 43 Welding Technology Development for the Fabrication of ITER Blanket Shield
Block in Korea / *Duck Hoi Kim et al.*
- 48 High Heat Flux Test with HIP Bonded 50x50 Be/Cu Mock-Ups for the ITER First
Wall / *Dong Won Lee et al.*
- 52 Development of a Twin-Screw D₂ Extruder for the ITER Pellet Injection System /
S. J. Meitner et al.
- 57 Source Profile Analysis for the ITER First Wall/Shield Module 13 / *B. Smith,
P. Wilson, M. Sawan, T. Bohm*

(Continued)

CONTENTS / JULY 2009—VOL. 56, NO. 1

(Continued)

DIVERTOR AND HIGH HEAT FLUX COMPONENTS

- 65 ITER Divertor System Integration / *A. Martin et al.*
- 70 Experimental and Numerical Investigation of Prototypical Multi-Jet Impingement (HEMJ) Helium-Cooled Divertor Modules / *L. Crosatti, J. B. Weathers, D. L. Sadowski, S. I. Abdel-Khalik, M. Yoda, R. Kruessmann, P. Norajitra*
- 75 Experimental and Numerical Investigation of the Thermal Performance of the Gas-Cooled Divertor Plate Concept / *E. Gayton, L. Crosatti, D. L. Sadowski, S. I. Abdel-Khalik, M. Yoda, S. Malang*
- 80 Development of a He-Cooled Divertor: Status of the Fabrication Technology / *P. Norajitra, J. Reiser, H.-J. Ritzhaupt-Kleissl, S. Dichiser, J. Konrad, G. Ritz*
- 85 Effects of Helium Ions on Hydrogen Isotope Behavior in Tungsten / *Y. Ueda, H. Kashiwagi, M. Fukumoto, Y. Ohtsuka, N. Yoshida*
- 91 Development of a High Heat Flux Test Facility for Plasma Facing Components / *Young-Dug Bae, Suk-Kwon Kim, Dong-Won Lee, Bong-Guen Hong*
- 96 Thermal Performance of a Prototypical Gas-Cooled T-Tube Divertor Module with Single-Sided Heating / *L. Crosatti, D. L. Sadowski, S. I. Abdel-Khalik, M. Yoda, ARIES Team*
- 101 Conceptual Design of a New Outer Divertor for C-Mod / *Peter Titus et al.*

PLASMA ENGINEERING AND DIAGNOSTICS

- 109 Waveguide Splitter for Lower Hybrid Current Drive / *P. Koert, P. MacGibbon, R. Vieira, D. Terry, R. Leccacorvi, J. Doody, W. Beck*
- 114 Modification of Alpha-Particle Emission Spectrum and Its Verification Scenario Using ${}^9\text{Be}+\alpha$ Reaction in Beam-Injected DT Plasmas / *Hideaki Matsuura, Yasuyuki Nakao*
- 119 Transmitter Protection System Upgrade Design for Lower Hybrid Current Drive System on Alcator C-Mod / *David R. Terry, Jeffrey A. Casey, Patrick A. MacGibbon, William M. Burke, Atma D. Kanojia, Lihua Zhou, J. A. Stillerman*
- 125 Surface Electrical Degradation of Helium Implanted Sapphire / *S. M. González de Vicente, A. Morono, E. R. Hodgson*
- 129 Preliminary Thermal and Hydraulic Analysis on the ITER Upper Diagnostic Port Plug During Normal Operation and Baking / *Sunil Pak, Mun-Seong Cheon, Hyeon Gon Lee, Michael R. Kalish, C. S. Pitcher, Christopher I. Walker*
- 134 Selected Design Solutions for the Integration of the CXRS Diagnostic in to ITER Upper Port Plug No. 3 / *S. Sadakov, W. Biel, M. von Hellermann, Yu. Krasikov, O. Neubauer, A. Panin*

TRITIUM, SAFETY, AND ENVIRONMENT

- 141 Korea's Activities for the Development of a Detritiation System / *Hongsuk Chung, Do-Hee Ahn, Kwang-Rag Kim, Seungwoo Paek, Minsoo Lee, Sung-Paal Yim, Myunghwa Shim*

(Continued)

CONTENTS / JULY 2009—VOL. 56, NO. 1

(Continued)

- 148** Numerical Analysis for Thermal and Mechanical Properties of Pebble Bed / *Shinji Ebara, Yasutaka Harai, Takehiko Yokomine, Akihiko Shimizu*
- 153** Adsorption of Hydrogen Isotopes on Various Adsorbents at Cryogenic Temperature / *Kenzo Munakata, Toshiharu Takeishi, Shunsaku Kajii, Takaaki Wajima, Yoshinori Kawamura*
- 158** Isotopic Distribution Coefficient of Tritiated Water Adsorbed on Faujasite-Type Zeolite / *Yasunori Iwai, Toshihiko Yamanishi*
- 163** Radiation-Induced Degradation in Ion Exchange Resins for a Water Detritiation System / *Yasunori Iwai, Toshihiko Yamanishi, Akihiro Hiroki, Masao Tamada*
- 168** Adsorption Capacity of Tritium on Mordenite at Low Temperature / *Yoshinori Kawamura, Yasunori Iwai, Takumi Hayashi, Toshihiko Yamanishi, Kenzo Munakata*
- 173** Overshooting Breakthrough Curves Formed in Pressure Swing Adsorption Process for Hydrogen Isotope Separation / *K. Kotoh et al.*
- 179** Thermal Transpiration Behavior of Hydrogen Isotopes in Cryogenic Pump System / *Kenji Kotoh, Masashi Kawahara, Keisuke Kimura, Kazuhiko Kudo*
- 184** Multi-Component Behavior of Hydrogen Isotopes in Zeolite Packed-Beds Used for Cryogenic Pressure Swing Adsorption / *K. Kotoh, M. Tanaka, T. Sakamoto, S. Takashima, T. Asakura, T. Uda, T. Sugiyama*
- 190** High Performance Corrosion Resistance of Nickel-Based Alloys in Molten Salt Fluorides / *Masatoshi Kondo et al.*
- 195** Measurements of Specific Electrical Contact Resistance Between SiC and Lead-Lithium Eutectic Alloy / *Neil B. Morley, Albert Medina, Mohamed A. Abdou*
- 201** Double-Layer Flow Channel Insert for Electric and Thermal Insulation in the Dual-Coolant Lead-Lithium Blanket / *Sergey Smolentsev, Siegfried Malang*
- 206** Experimental Measurements of the Interface Thermal Conductance of a Lithium Metatitanate Pebble Bed / *A. Abou-Sena, A. Ying, M. Abdou*
- 211** Thermal Analysis of a Solid Breeder TBM Under ITER Operational Conditions / *A. Abou-Sena, A. Ying, M. Youssef, M. Abdou*
- 216** Current R&D Activities on Korean Helium Cooled Solid Breeder Test Blanket Module / *Seungyon Cho et al.*
- 221** Design Update and Mock-Up Test Strategy for the Validation of the EU-HCPB-TBM Concept / *F. Cismondi et al.*
- 227** Measurement of Reaction Rate Distribution in Partial Mockups for the ITER TBM with DT Neutrons / *S. Sato et al.*
- 232** Global Depletion Analysis of Korean Helium-Cooled Solid Breeder TBM Model for Testing in ITER / *Sunghwan Yun, Nam Zin Cho, Mu-Young Ahn, Seungyon Cho*
- 239** Tritium Room Air Monitor Operating Experience Review / *L. C. Cadwallader, B. J. Denny*

(Continued)

CONTENTS / JULY 2009—VOL. 56, NO. 1

(Continued)

- 245 Continuous Air Monitor Operating Experience Review / *L. C. Cadwallader, S. A. Bruyere*
- 252 A Preliminary Assessment of the Occupational Radiation Exposure from Maintaining the US ITER DCLL TBM / *Brad J. Merrill, Lee C. Cadwallader, Mohamad Dagher*

FUSION MATERIALS

- 259 Status of IFMIF EVEDA, One Year After Its Start-Up / *Masayoshi Sugimoto et al.*
- 267 Thermo-Hydraulic Design of High Flux Test Module for IFMIF-EVEDA in Japan / *T. Yokomine, S. Ebara, A. Shimizu*
- 273 First IFMIF/EVEDA Radioprotection Studies for the Preliminary Design of the Accelerator Beam Dump / *J. Sanz, M. Garcia, F. Ogando, A. Mayoral, D. López, P. Sauvan, B. Brañas*
- 281 Validation of Modeling Tools to Describe the Corrosion/Precipitation Behavior of Eurofer Steel in Flowing Pb-17Li / *J. Konys, W. Krauss, H. Steiner*
- 289 Mechanical Properties of Two Improved Eurofer ODS Steels Before and After Low Dose Neutron Irradiation at 300 °C / *Enrico Lucon*
- 295 High Average Power Petawatt Laser Pumped by the Mercury Laser for Fusion Materials Engineering / *A. J. Bayramian et al.*
- 301 Investigation of Turbulent Rectangular Shaped Contraction Nozzle Flow for IFMIF Target Application, Validation of Turbulence Models / *S. Gordeev, L. Stoppel, R. Stieglitz, M. Daubner, F. Fellmoser*
- 309 Thermal Influence on Erbium Oxide Coating for Tritium Permeation Barrier / *Takumi Chikada et al.*
- 314 Influence of Self-Interstitial Mobility on He-Vacancy Cluster Nucleation and Growth in Nickel / *B. Gámez, L. Gámez, M. J. Caturla, E. Martínez, E. del Río, J. M. Perlado*
- 318 Mechanical Property Changes and Irradiation Hardening Due to Dissimilar Metal Welding with Reduced Activation Ferritic/Martensitic Steel and 316L Stainless Steel / *N. Hara, S. Nogami, T. Nagasaka, A. Hasegawa, H. Tanigawa, T. Muroga*
- 323 Creep Properties and Microstructure of JLF-1 and CLAM Steels Aged at 823 to 973 K / *Yanfen Li, Takuya Nagasaka, Takeo Muroga*
- 328 Defect Properties in β -SiC Under Irradiation—Formation Energy of Interstitial Clusters / *Yoshiyuki Watanabe, Kazunori Morishita, Akira Kohyama, Howard L. Heinisch, Fei Gao*

HIGH AVERAGE POWER LASER AND OTHER IFE R&D

- 333 Laser IFE Direct Drive Chamber Concepts with Magnetic Intervention / *A. R. Raffray et al.*
- 341 A Unified Model for Ion Deposition and Thermomechanical Response in Dry Wall Laser IFE Chambers / *James P. Blanchard, Qiyang Hu, Nasr Ghoniem*

(Continued)

CONTENTS / JULY 2009—VOL. 56, NO. 1

(Continued)

- 346 Electra: An Electron Beam Pumped KrF Rep-Rate Laser System for Inertial Fusion Energy / *P. M. Burns et al.*
- 352 Retention and Surface Pore Formation in Helium Implanted Tungsten as a Fusion First Wall Material / *S. J. Zenobia, G. L. Kulcinski*
- 361 Activities on the Laser Fusion Reactor KOYO-F in Japan / *T. Norimatsu et al.*
- 369 Comparison of Potential Ceramic Gain Media / *B. J. Le Garrec, G. L. Bourdet, V. Cardinali*

IFE TARGET DESIGN

- 377 Direct Drive Fusion Energy Shock Ignition Designs for Sub-MJ Lasers / *Andrew J. Schmitt, J. W. Bates, S. P. Obenschain, S. T. Zalesak, D. E. Fyfe, R. Betti*
- 384 Reduction of Threshold for Laser Fusion Ignition by Nonlinear Force Driven Block Acceleration / *G. H. Miley, H. Hora, B. Malekynia, M. Ghoranneviss*
- 391 On the Possibility of Electron Degeneracy Diagnostics in Laser-Imploded DT Fuel for Fast Ignition / *Y. Nakao, N. Senmyo, N. Nakamura, H. Matsuura, T. Johzaki, V. T. Voronchev*
- 395 Deuterium Cluster Target for Ultra-High Density Fusion / *George H. Miley, Xiaoling Yang*
- 401 Ignition and Burn Properties of DT/D³He Fuel for Fast-Ignition Inertial Confinement Fusion / *Y. Nakao, M. Katsube, T. Ohmura, Y. Saito, T. Johzaki, K. Mima*
- 405 Development of a Cryogenic Target Delivery System for HiPER / *Paul J. Perin, J. Manuel Perlado, Martin Tolley, Team of WP6/HiPER*
- 409 Improving the Accuracy of a Target Engagement Demonstration / *Lane Carlson, Mark Tillack, Jeremy Stromsoe, Neil Alexander, Dan Goodin, Ronald Petzoldt*
- 417 Target Injection with Electrostatic Acceleration / *R. W. Petzoldt, D. T. Goodin, E. Valmianski, L. C. Carlson, J. Stromsoe, R. K. Friend, J. Hares*
- 422 Numerical and Experimental Analysis of a Fluidized Bed for IFE Target Layering / *Kurt J. Boehm, A. R. Raffray, N. B. Alexander, D. T. Frey, D. T. Goodin*
- 427 Temperature Control in a Cryogenic Target with a Conical Laser Guide for Fuel Layering / *A. Iwamoto et al.*

IFE DRIVERS AND CHAMBERS

- 435 Thermo-Mechanical Analysis of the Hibachi Foil for the Electra Laser System / *Aaron Aoyama, James Blanchard, John Sethian, Nasr Ghoniem, Shahram Sharafat*
- 441 Electra KrF Laser Hibachi Foil Cooling with Near-Wall Jets / *B. Lu, S. I. Abdel-Khalik, D. L. Sadowski, K. G. Schoonover, F. Hegeler, P. M. Burns, J. D. Sethian*

(Continued)

CONTENTS / JULY 2009—VOL. 56, NO. 1

(Continued)

- 446** Long-Term Survival of Grazing-Incidence Metal Mirrors for Laser Fusion / *M. S. Tillack, J. E. Pulsifer*
- 452** Plans for Warm Dense Matter and IFE Target Experiments on NDCX-II / *W. L. Waldron et al.*
- 456** Computational Study on Multi-Electron Collisions for Low-Charge-State Heavy Ions / *Linchun Wu, George H. Miley, Hiromu Momota*
- 460** Richtmyer-Meshkov Parameter Study / *Chris Weber, Bradley Motl, Jason Oakley, Mark Anderson, Riccardo Bonazza*
- 465** Shrapnel Generation from Recyclable Transmission Lines / *S. G. Durbin, C. W. Morrow, M. E. Kipp, D. L. Smith*
- 470** Analysis of Carbon-Bearing Materials for Use as First Wall Armor in the High Average Power Laser (HAPL) Chamber / *T. A. Heltemes, G. A. Moses*
- 475** Comparative Study to Evaluate Candidate Materials for Tritium Production in a Direct Drive IFE Reactor / *M. Aristova, C. A. Gentile*
- 478** Comparison of Two Types of Blanket Concepts for a Fast Ignition ICF Reactor FALCON-D / *Youji Someya, Tetsuo Matsumoto, Ryoji Hiwatari, Yoshiyuki Asaoka, Kunihiko Okano, Takuya Goto, Yuichi Ogawa*

EXPERIMENTAL FACILITIES AND NONELECTRIC APPLICATIONS

- 485** Engineering Accomplishments in the Construction of NCSX / *G. H. Neilson et al.*
- 493** Near Term Applications of Inertial Electrostatic Confinement Fusion Research / *G. L. Kulcinski et al.*
- 501** The IEC Fusion-Plasma Torch—A Path for Closing the Materials Cycle / *William C. Gough, George H. Miley*
- 507** Optimization of an IEC Fusion Device to Increase Steady-State D-D Neutron Generation Rates / *D. C. Donovan, D. R. Boris, G. L. Kulcinski, J. F. Santarius*
- 512** Solenoid-Less Plasma Start-Up in NSTX Using Transient CHI / *R. Raman et al.*
- 518** Production of Carbon-11 from D-³He Fusion Devices / *Brian J. Egle, Gerald L. Kulcinski*
- 523** Built-In Ion Source for Inertial Electrostatic Confinement in Low Pressure Regime / *Kai Masuda, Tomoya Nakagawa, Taiju Kajiwara, Heishun Zen, Kiyoshi Yoshikawa, Kazunobu Nagasaki*
- 528** Diagnostic System Development for D-D and D-³He Reaction Distributions in an Inertial-Electrostatic Confinement Device by Collimated Proton Measurements / *Kai Masuda, Takeshi Fujimoto, Tomoya Nakagawa, Heishun Zen, Taiju Kajiwara, Kazunobu Nagasaki, Kiyoshi Yoshikawa*
- 533** Space Probe Application of IEC Thrusters / *George H. Miley et al.*
- 540** Special Nuclear Materials Detection Using IEC Fusion Pulsed Neutron Source / *J. H. Sorebo, G. L. Kulcinski, R. F. Radel, J. F. Santarius*
