

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 165, NUMBER 1, MAY 2010

## CONTENTS

### TECHNICAL PAPERS

- 1** On the Evaluation of Discrepant Scientific Data with Unrecognized Errors *Dan G. Cacuci, Mihaela Ionescu-Bujor*
- 18** Best-Estimate Model Calibration and Prediction Through Experimental Data Assimilation—I: Mathematical Framework *Dan G. Cacuci, Mihaela Ionescu-Bujor*
- 45** Best-Estimate Model Calibration and Prediction Through Experimental Data Assimilation—II: Application to a Blowdown Benchmark Experiment *Alessandro Petruzzi, Dan G. Cacuci, Francesco D'Auria*
- 101** Scaled and Full-Size Three-Loop Reactor Vessel Simulation for Boron Dilution Studies Using Computational Fluid Dynamics *T. V. Dury, M. T. Dhotre*
- 117** The  $^{235}\text{U}(n, f)$  Prompt Fission Neutron Spectrum at 100 K Input Neutron Energy *N. Kornilov, F.-J. Hambsch, I. Fabry, S. Oberstedt, T. Belgya, Z. Kis, L. Szentmiklosi, S. Simakov*

### LETTERS TO THE EDITOR

- 128** Comments on "Numerical Stability of Existing Monte Carlo Burnup Codes in Cycle Calculations of Critical Reactors" *Gray S. Chang*
- 130** Reply to "Comments on 'Numerical Stability of Existing Monte Carlo Burnup Codes in Cycle Calculations of Critical Reactors'" *Jan Dufek*
