

High-Level Waste Management

Regulatory Basis for SNF Storage Canister Inspections 24

A discussion on the regulatory framework for aging management inspections of dry storage systems.

Borehole Construction and Operation for Disposal in Crystalline Rocks 28

An approach to disposing of radioactive waste in very deep boreholes.

Low-Level Waste Management

Part 61 Heads to the Finish Line 34

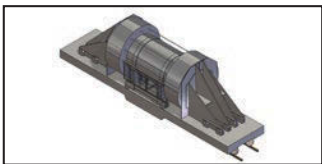

Based on comments on last year's draft rule, the NRC has made several changes to the agency's low-level waste disposal regulations.

Management of Radioactive Waste after a Nuclear Power Plant Accident 36

A report by the Nuclear Energy Agency of the Organization for Economic Co-operation and Development.

Transportation

The Atlas Railcar Project 40

An Areva-led team has completed the first phase of designing and fabricating a railcar for transporting high-level radioactive waste.

The Safe Route to HazMat Transportation: A 3PL Perspective 44

Using a third-party logistics provider when transporting radioactive waste and hazardous materials.

Decontamination and Decommissioning

The Hematite Decommissioning Project 48

Lessons learned during the first decommissioning and remediation of a nuclear fuel facility in the U.S.

Meeting Reports

Applying Lessons Learned and Remote-Operated Systems to D&D. 56

A report from the ANS Decommissioning and Remote Systems joint topical, held July 31-August 4, 2016, in Pittsburgh, Pa.

Decommissioning and the Nuclear Promise. 62

A report from Nuclear Energy Insider's Nuclear Decommissioning and Used Fuel Strategy Summit, held October 3-4, 2016, in Charlotte, N.C.
