

Nuclear power plants make electricity and help keep our air clean.

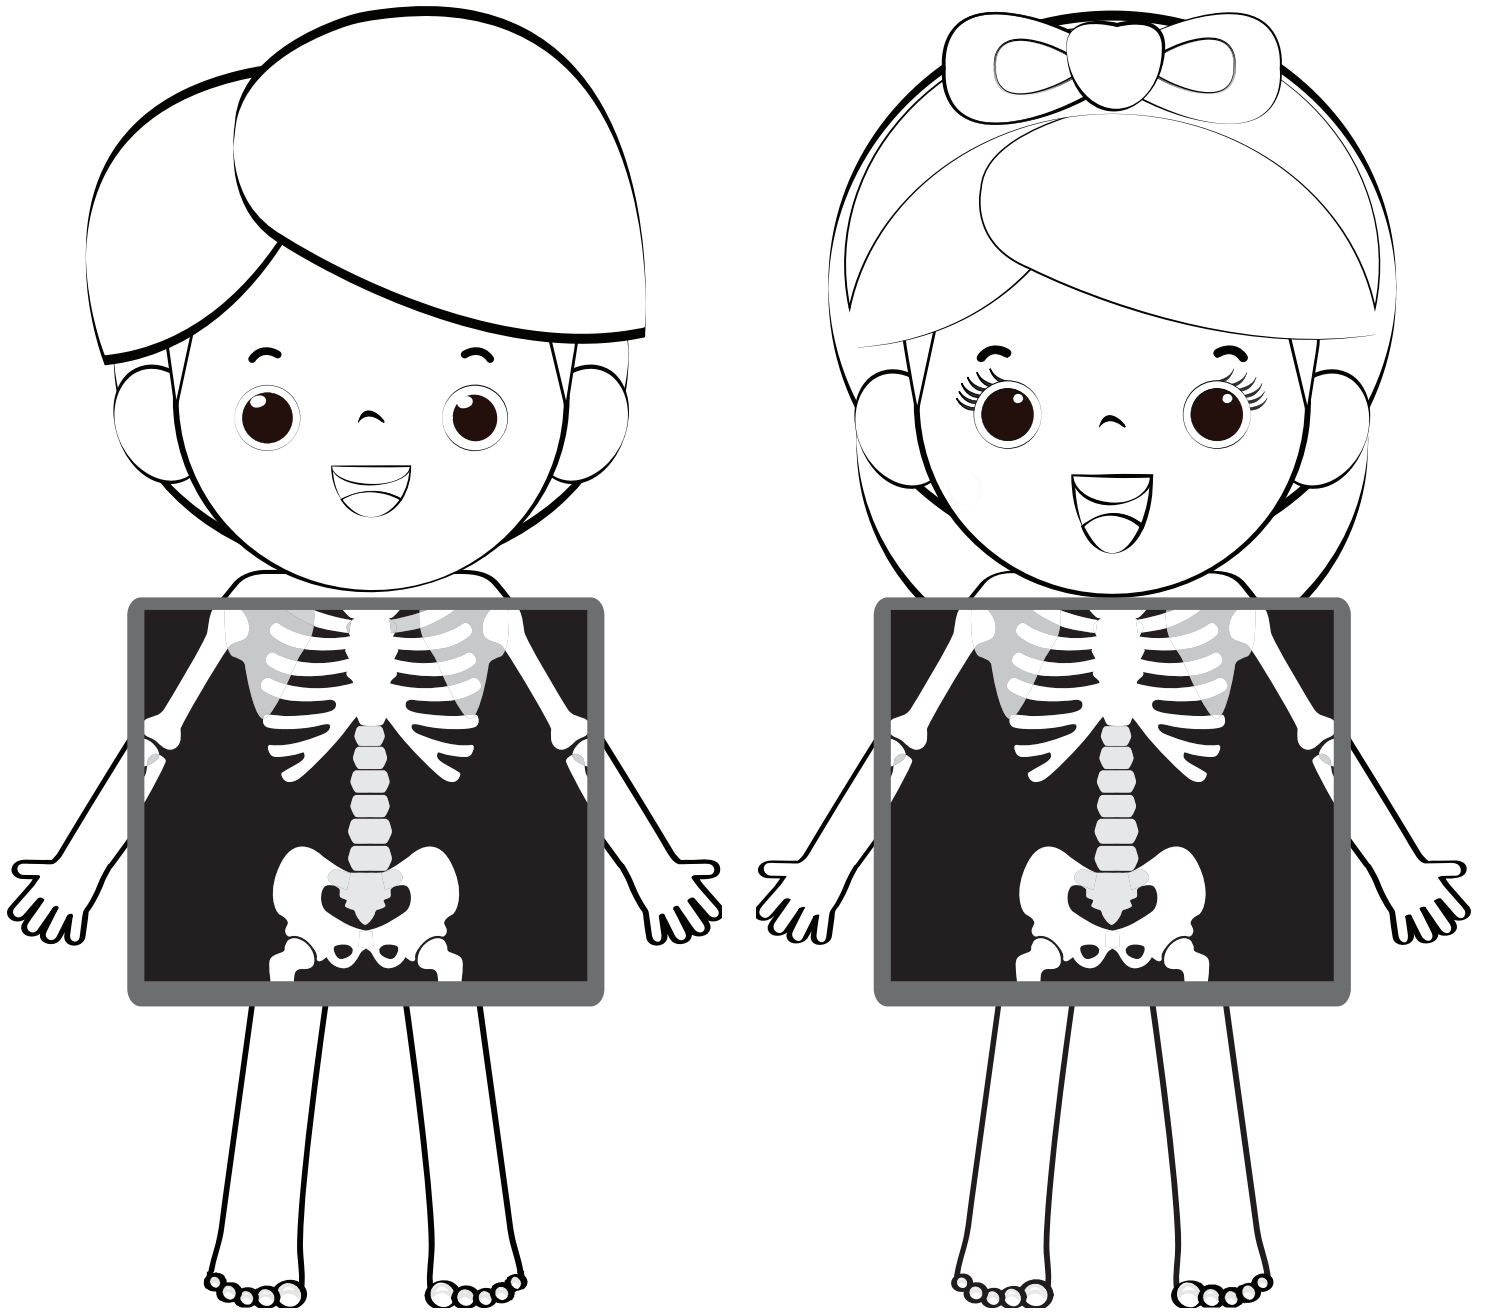

How many things in this picture need electricity to work?

Circle them!

Then color the picture.

X-rays take pictures of the bones in our bodies.

Just like a beach is made of many grains of sand,
everything in our world is made up of many very
tiny pieces too small to be seen.
We call these pieces **ATOMS**.

atoms

Trace the word atom, and write the word atom.
See samples.
