REFERENCE INDEXES

Index to Advertisers

This listing (pp. 8–14) gives in alphabetical order all of the companies advertising in this year's Buyers Guide, the page number(s) on which their ad(s) can be found, and current contact information.

Index to Categories

This listing (pp. 18–31) gives in alphabetical order all of the categories that are presented in Section I ("Nuclear Products, Materials & Services Directory"). Page locations are shown in **bold face**; category code numbers in light face. Extensive cross references are included *only* in this index to help users find categories of interest.

SECTION I

Nuclear Products, Materials & Services Directory

This section (pp. 33–118), lists in alphabetical order the various categories of products, materials, and services that are used in the nuclear industry. There are 473 categories, each with the names of suppliers and their locations.

Several product categories are further divided into subcategories, which are identified by code letters. In a given category, the code letters accompanying suppliers' names indicate which subcategories are offered.

Please refer to the Index of Categories (pp. 18–31) for extensive cross-references.

Companies advertising in this year's Buyers Guide are identified by a diamond (◆) preceding their names, and are **highlighted in blue** in the category near which their advertisement appears. Consult the Index to Advertisers (pp. 8–14) for location information.

SECTION II

Directory of Suppliers

This section (pp. 121–152) lists in alphabetical order the suppliers represented in Section I, divided into two parts: suppliers located in the United States (from page 121); and suppliers located outside the United States (from page 148).

Each listing provides the supplier's name, location, contact information, and N Stamp information, where applicable. Also included are the code numbers designating the product, material, and service categories under which each company is listed in Section I. To translate code numbers into category names, refer to the Index to Categories (pp. 18–31).

Advertisers in this year's Buyers Guide are **highlighted in yellow**. A separate line shows the page number of the advertisement (see also the Index to Advertisers, pp. 8–14).

DELIVERING THE FUTURE OF NUCLEAR ENERGY

Together with our utility partners, Bechtel has delivered over 76,000 MW of carbon-free nuclear energy to the grid.

• TVA CLINCH RIVER

Bechtel is Tennessee Valley Authority's construction partner planning and evaluating deployment of the first small modular reactor BWRX-300 by GE Hitachi at the Clinch River Nuclear site in Tennessee.

Small Modular Reactor

Advanced Reactor

• NATRIUM® DEMONSTRATION

Bechtel is the engineering partner for TerraPower, the advanced nuclear technology firm leading the development and deployment of the Natrium® technology as part of a unique public-private Advanced Reactor Development Program (ARDP) with the U.S. Department of Energy to design and build a demonstration plant for the Natrium sodium fast reactor.

• POLAND AP1000®

Bechtel has been chosen to partner on the design and construction of Poland's first-ever nuclear power plant, located at the Lubiatowo-Kopalino site in Pomerania.

Large AP1000 Reactors

2023

• PLANT VOGTLE, UNITS 3 & 4

Bechtel was selected to complete the construction and support commissioning of Vogtle Units 3 & 4, the first advanced Gen III+ units built in the U.S.

• WATTS BAR UNIT 2

Bechtel was the primecontractor to the Tennessee Valley Authority and provided EPC services in the successful completion and return to service of the deferred Watts Bar Unit 2.

2016

• DRESDEN

Bechtel worked with partners to develop the Dresden Nuclear Station, the world's first privately financed nuclear power plant.

1957

• PALO VERDE, UNITS 1, 2 & 3

Bechtel was the architect/engineer and constructor of Palo Verde in the Arizona desert, the largest nuclear plant in the U.S. at the time (recently eclipsed by Vogtle).

THE SECRET TO SAVING YOUR PLANT OUTAGE TIME AND MONEY

Prevention Is The Key

One piece of metal wire wheel or other foreign material can trigger millions of dollars in additional expenses for a Nuclear Power Plant by causing fuel or critical equipment damage. Costs associated with these events include:

- Lost Power Generation
- Increased Personnel Dose
- Purchasing Replacement Power
- Repairing or Replacing Fuel and Associated Labor Costs
- Extended Outage Time

Plant leadership can help reduce the risk of Fuel Leaks by building and maintaining robust FME and Drop Prevention programs. Alphasource's experienced team can help you develop your program, comply with industry standards, and increase plant efficiency. For over 3 decades, Alphasource® has designed and manufactured high quality FME & Drop Prevention devices that address real end-user challenges. Alphasource® offers thousands of unique FME and Drop Prevention solutions that help nuclear facilities increase capacity factors by keeping their systems up and running. Don't become tomorrow's Operating Experience – Be today's Good Practice Benchmark!

SMALL MODULAR REACTOR**SMR-300™**

SMR-300™ helps the world meet its climate goals by using fission to create clean, carbon-free energy.

Can be configured to start without outside power sources and can run independently from local electrical grids.

Can be used in the world's driest regions, with the use of air-cooled condensers.

As the demand for clean, always-on power increases, we have the solution in the **SMR-300™**.

Holtec's SMR-300 is an advanced Pressurized Water Reactor (PWR) that is deployed in a dual-unit configuration (two SMR-300 units) within a single plant envelope that will generate approximately 600 MW of clean electricity to power communities, businesses and large power off-takers. The SMR-300 is designed and engineered to provide clean power 24/7, 365 days a year to meet the world's growing energy needs.

“Many a small thing has been made large by the right kind of advertising.”

– Mark Twain

This section lists in alphabetical order the companies represented in Section I of the Buyers Guide, “Nuclear Products, Materials, & Services Directory.” Each listing includes the supplier’s location, sales contact (name), telephone numbers, N Stamp information, and code numbers corresponding to the categories under which each company is listed. When provided by the company, email and/or website addresses are also included. An asterisk (*) appearing at the end of the listing indicates that a full-line product, materials, and/or services catalog is available from the supplier. Those suppliers that have an advertisement in *Nuclear News* Buyers Guide 2025 are highlighted in yellow. The “Directory of Suppliers” is divided into two parts: Part 1 lists companies located in the United States; Part 2, companies in other countries (page 148).
