Meetings 2022-23

14th International Conference on Radiation Shielding and 21st Topical Meeting of the Radiation Protection and Shielding Division (ICRS 14/RPSD 2022) SEP 25-29, 2022 | Seattle, WA
Exposing the RPSD and ICRS communities to new tools that make them more effective, showing them the value of membership. Tool developers, code users, theoreticians, and experimentalists will engage in productive discussions, establish collaborations, and build community in the foreground of scientific advancements and challenges in radiation protection and shielding.

Top Fuel 2022 Light Water Reactor Fuel Performance Conference
OCT 9-13, 2021 | Raleigh, NC
TopFuel is the preeminent international meeting on new developments in LWR fuel performance held every year, alternating between Asia, Europe and the U.S.

2022 ANS Winter Meeting and Nuclear Technology Expo
NOV 13-17, 2022 | Phoenix, AZ | Arizona Grand Resort
The ANS Winter Meeting promises to be one of the year’s most exciting and informative educational and networking events for attendees from every facet of nuclear science and technology. In addition, the Technology Expo will give attendees a glimpse into the applications of new technology through three days of exhibits and special events. The Expo will also give attendees many opportunities to network with each other and establish new professional relationships while having food and fun in a friendly and informal setting.

Embedded Topical Meeting: International High-Level Radioactive Waste Management

Conference on Nuclear Training and Education: A Biennial International Forum (CONTE 2023) FEB 6–9, 2023 | Amelia Island, FL
Maintaining Excellence Today – Building the Nuclear Workforce for Tomorrow! Learn about: Global Nuclear Energy Issues and Challenges; Status of New Nuclear; Insights on Decommissioning; Establishing the Training Conscience; Leadership Development; Innovations in Education and Training; Emerging Industry Trends in Training; Accreditation Health and more.

2023 Student Conference
April 13–15, 2023 | University of Tennessee at Knoxville
For the first time, the ANS Student Conference will be held at the University of Tennessee, Knoxville in 2023. We are excited to welcome students from around the country to our beautiful city and introduce them to the exciting events happening within the Department of Nuclear Engineering as well as in the surrounding area. We have chosen the theme of “Passing the Torch” to pay homage to our University’s academic mascot, the Torchbearer. Living by this theme, we want the conference to be a symbol for continuing nuclear sciences from one generation to the next. Our intentions for all attendees of the conference are to reflect on the growth of the nuclear industry, along with thinking innovatively when hearing from those that came before to motivate nuclear scientists and engineers in progressing one step forward towards their individual aspirations.
