

# NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 61, NUMBER 4, DECEMBER 1976

## CONTENTS

### TECHNICAL PAPERS

- |     |                                                                                                                           |                                                                                                                                                                                                                                       |
|-----|---------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 451 | An Early-Time Analysis of Space-Dependent Nuclear Reactor Transients                                                      | <i>S. L. Paveri-Fontana,<br/>P. L. Chambré</i>                                                                                                                                                                                        |
| 466 | Reactor-Fuel-Independent Reactivity Determinations                                                                        | <i>S. Pearlstein</i>                                                                                                                                                                                                                  |
| 471 | Measurement of the Ratio of Fission to Capture Neutron Cross Sections in Uranium-235 in the 200-eV to 15-keV Energy Range | <i>H. Bluhm, C. S. Yen</i>                                                                                                                                                                                                            |
| 477 | Fission Cross Section of Neptunium-237 from 3 eV to 2 MeV                                                                 | <i>S. Plattard, J. Blons, D. Paya</i>                                                                                                                                                                                                 |
| 496 | The ENDF/B-IV Representation of the Uranium-238 Total Neutron Cross Section in the Resolved Resonance Energy Region       | <i>G. de Saussure, D. K. Olsen,<br/>R. B. Perez</i>                                                                                                                                                                                   |
| 507 | Measurement of the Angular Neutron Energy Spectra Originating from a 14-MeV Neutron Source in Liquid Air                  | <i>K. Clausen, B. Bröcker,<br/>P. Schneider-Kühnle,<br/>M. Weinert</i>                                                                                                                                                                |
| 521 | Differential Elastic and Inelastic Scattering of 9- to 15-MeV Neutrons from Carbon                                        | <i>D. W. Glasgow, F. O. Purser,<br/>H. Hogue, J. C. Clement,<br/>K. Stelzer, G. Mack,<br/>J. R. Boyce, D. H. Epperson,<br/>S. G. Buccino, P. W. Lisowski,<br/>S. G. Glendinning,<br/>E. G. Bilpuch, H. W. Newson,<br/>C. R. Gould</i> |

### TECHNICAL NOTES

- |     |                                                                                                            |                                                 |
|-----|------------------------------------------------------------------------------------------------------------|-------------------------------------------------|
| 534 | Spherical Harmonics Approximations of Neutron Transport                                                    | <i>A. Demény, K. M. Dede,<br/>K. Erdei</i>      |
| 536 | A Numerical Method for Solving the Integral Equation of Neutron Transport: III                             | <i>Robert W. Tsai,<br/>Sudarshan K. Loyalka</i> |
| 540 | Measurement of Cross Sections for the ${}^7\text{Li}(n,n'\gamma){}^7\text{Li}$ Reaction from 0.57 to 4 MeV | <i>Donald L. Smith</i>                          |
| 543 | Rational Approximations for Cross-Section Space-Shielding in Doubly Heterogeneous Systems                  | <i>M. G. Stamatelatos</i>                       |
