

NUCLEAR SCIENCE AND ENGINEERING®

VOLUME 172, NUMBER 2, OCTOBER 2012

CONTENTS

TECHNICAL PAPERS

- | | | |
|-----|--|---|
| 127 | Asymptotic Wielandt Method and Superhistory Method for Source Convergence in Monte Carlo Criticality Calculation | <i>Ding She, Kan Wang, Ganglin Yu</i> |
| 138 | Calculating the Second Eigenpair in Criticality Calculations Using the Monte Carlo Method with Source Points Pairing as an Efficient Net-Weight (Cancellation) Algorithm | <i>Bo Shi, Bojan Petrovic</i> |
| 151 | A Monte Carlo Code for Radiation Damage by Neutrons | <i>V. Kumar, Nagendra Singh Raghaw, H. S. Palsania</i> |
| 164 | Zero Variance Penalty Model for the Generation of Covariance Matrices in Integral Data Assimilation Problems | <i>G. Noguere, P. Archier, C. De Saint Jean, B. Habert</i> |
| 180 | Uncertainty Quantification for New Approaches to Spent Fuel Assay | <i>Tom Burr, Jeremy Conlin, Jianwei Hu, Jack Galloway, Vladimir Henzl, Howard Menlove, Martyn Swinhoe, Stephen Tobin, Holly Trellue, Timothy Ulrich</i> |
| 193 | Explicit Flux Autocorrelation Dependence on Dominance Ratio in Monte Carlo Criticality Calculations of Large Cores | <i>Sergey S. Gorodkov</i> |
| 202 | Dispersion Properties of B ₄ C Microparticles as Emergency Neutron Absorbers in Spent-Fuel Pool Water | <i>You-Jin Jung, Jaesik Hwang, Jei-Won Yeon, Bong Hyun Boo, Kyuseok Song</i> |
| 208 | Fluctuations of Mass Yield Distribution for the Epithermal Fission of ²³⁵ U and Its Impact on HCLWR Calculations | <i>P. Leconte, J.-P. Hudelot, M. Antony</i> |

TECHNICAL NOTE

- | | | |
|-----|--|----------------------------------|
| 216 | A Parallel Krylov-Based Adjoint Sensitivity Analysis Procedure | <i>R. T. Evans, D. G. Cacuci</i> |
|-----|--|----------------------------------|
