

# TECHNICAL REVIEWERS

We are grateful to the dedicated professionals who perform the arduous tasks of reviewing papers for *Nuclear Technology*. Their performance largely determines the technical quality of the journal and is an essential part of the scientific processes of validation and communication.

Since the reviewers' identification with the work they review must remain anonymous, we are recognizing their contributions publicly by listing them here in this, the final issue of *Nuclear Technology* for 1982. Many authors have expressed their appreciation for the reviewers' dedication and contributions. I am particularly grateful to each and every one of them.

Roy G. Post  
Editor
