

CORRIGENDUM

R. G. SPENCE and A. L. WRIGHT, "The Importance of Fission Production/Aerosol Interactions in Reactor Accident Calculations," *Nucl. Technol.*, **77**, 150 (1987).

On p. 150, column 2, line 9, using the assumptions given in this paragraph, the value of "~150 mol of a vapor" should be "8.3 mol of a vapor," making the "5 to 100% of the inventory" on line 10, "0.3 to 14% of the inventory."
