

## Subject Index

Volume 202 · Numbers 1, 2, and 3  
April, May, and June 2018

- Accelerated aging, 124
- Accumulator, 71
- Active magnetic bearings, 180
- Advanced control, 180
- Alternative explanations, 230
- Computer-based procedures, 247
- Confirmation bias, 230
- Control room, 278, 290
  - modernization, 220
- Critical infrastructure resilience, 1
- Cross-power spectral density, 173
- Decision making, 230
- Design, 290
- Diversity and defense-in-depth, 101
- Dynamic modeling, 15
- Electromagnetic interference, 173
- Electronic work package, 201
- Embedded instrumentation and control, 180
- Emergency operation, 247
  - procedure, 210
- Eye tracking, 220, 237
- Fault propagation and effects analysis, 106
- Feed and bleed operation, 210
- Feedback, 15
- Fluidized bed chemical vapor deposition, 81
- Fuel cycle cost, 39
- Grid resilience, 1
- Heavy water reactor, 39
- High temperature, 161
- Human factors
  - engineering, 220
  - ergonomics, 290
- Human reliability analysis, 259
- HuREX, 259
- Hypalon, 124
- Industry need survey, 201
- Information searching, 237
- Instrumentation and control, 101, 141
- Integral pressurized water reactor, 53
- Ionization chambers, 94
- Johnson noise thermometry, 173
- Large-screen display, 247
- Living organisms, 141
- Long-term cooling, 71
- Long-term electrical cable performance, 124
- Machine learning, 153
- MAPOD, 161
- Molten-salt breeder reactor, 15
- Monitoring, 237
- Neutron, 94
- Nuclear hybrid energy systems, 106
- Nuclear power plant, 141
- Nuclear power reactor, 191
- Online monitoring system, 106
- Operational strategy, 210
- Piezoelectric transducer, 161
- Pressure tube, 153
- Resilience, 141
- Resilient nuclear power plant, 1
- RETRAN-3D, 71
- Safety demonstration, 132
- Secure ultrawideband communications, 191
- Self-healing, 141
- Small modular reactor, 53
- Smart devices, 132
- Software common cause failure, 101
- Source code analysis, 132
- Spectral estimation, 173
- Spectrum unfolding, 94
- Thermal energy storage, 53
- Thorium-based fuel, 39
- Ultrasonic inspection, 153
- Uranium-molybdenum particles, 81
- Validation, 278
- Virtual reality, 278
- Wireless sensors, 191
- Work process automation, 201
- ZrN coatings, 81
