

Nuclear Science and Engineering

VOLUME 194 · NUMBER 1 · JANUARY 2020

Contents

TECHNICAL PAPERS

- 1 Three-Dimensional Pin-Resolved Transient Diffusion Analysis of PWR Core by the Hybrid Coarse-Mesh Finite Difference Algorithm
Jaeha Kim, Yonghee Kim

- 14 Deterministic Truncation of the Monte Carlo Transport Solution for Reactor Eigenvalue and Pinwise Power Distribution
Inhyung Kim, HyeonTae Kim, Yonghee Kim

- 32 Development of the Assembly-Level Monte Carlo Neutron Transport Code M3C for Reactor Physics Calculations
Anek Kumar, Umasankari Kannan, S. Ganesan

- 44 Generation of Multigroup Cross Sections with an Improved Monte Carlo Algorithm
Li Cheng, Bin Zhong, Huayun Shen, Zehua Hu, Baiwen Li

- 56 Derivation of the Two-Exponential Probability Density Function for Rossi-Alpha Measurements of Reflected Assemblies and Validation for the Special Case of Shielded Measurements
Michael Y. Hua, Jesson D. Hutchinson, George E. McKenzie, Tony H. Shin, Shaun D. Clarke, Sara A. Pozzi

- 69 Effects of Gamma Irradiation on the Morphological, Physical, and Thermal Properties of B₄C/CF/PI/AA6061 Hybrid Composite Laminates
Xuelong Fu, Jie Tao, Dunwen Zuo

ADDENDUM

- 84 Approximate Methods for Inverting Generating Functions from the Pál-Bell Equations for Low Source Problems
M. M. R. Williams
