RESEARCH ARTICLES

- 1739** The Random Ray Method Versus Multigroup Monte Carlo: The Method of Characteristics in OpenMC and SCONE
Paul Cosgrove, John R. Tramm
- 1759** A Discontinuous Galerkin Finite Element Method with Physical Modal Basis for the Neutron Transport Equation on Arbitrary Polygonal Meshes
Tao Dai, Longfei Xu, Baiwen Li, Huayun Shen, Xueming Shi
- 1776** Stability and Performance of the X-CMFD Method for Multiphysics Reactor Calculations
Qicang Shen, Nickolas Adamowicz, Sooyoung Choi, Yuxuan Liu, Brendan Kochunas
- 1806** Investigations of Gamma and Neutron Shielding Parameters of Ti-Nb-Fe-Cr Alloys with Varying Cr Concentrations
G. B. Hiremath, V. P. Singh, N. H. Ayachit, N. M. Badiger
- 1817** Validation of a Machine Learning–Based Nuclear Forensics Methodology for the Discrimination of a Chemically Separated Plutonium Sample from Low-Enriched Uranium
Patrick J. O’Neal, Sean P. Martinson, Sunil S. Chirayath
- 1830** Study of Influences of the Level of Zr Oxidation and Volumetric Heat Generation on Heat Transfer and Crust Formation Within CANDU Corium
Mahsa Rezaee, Dijo David, Marilyn Lightstone, Stephen Tullis
- 1843** Investigations of Suction Recirculation in Primary Sodium Pump of Future Indian Fast Breeder Reactors
M. Rajendrakumar, K. Natesan, K. Devan
- 1874** Analysis of the Use of Different Backing Layer Materials in the Design of Alpha-Decay Sails for Interplanetary and Interstellar Travel
Rio Quinn
- 1879** Convergence Analysis for the CMFD Accelerated Linear Axial Expansion Transport Method Based on Fourier Analysis
Xinyu Zhou, Kun Liu, Haitao Ju, Chen Zhao, Hongbo Zhang, Bo Wang, Wenbo Zhao, Zhang Chen
