Article title: Three-Dimensional Heat Flux and Thermal Analysis of Angled Tungsten Samples on DIII-D

Authors: J. Coburn, R. Kolasinski, D. Truong, D. Rudakov, H. Wang, J. Ren, C. Lasnier, C. Marini, J. Sugar, R. Nygren, A. Cruz, T. Abrams, and J. Watkins

Journal: *Fusion Science and Technology*

DOI: <https://doi.org/10.1080/15361055.2025.2493406>

The following acknowledgments and funding statements were not included in the initially published version of this article. These have now been inserted in the appropriate sections in the published article.

Disclosure Statement

This report was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor any agency thereof, nor any of their employees, makes any warranty, express or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, trademark, manufacturer, or otherwise does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or any agency thereof.

Funding

This material is based upon work supported by the U.S. Department of Energy, Office of Science, Office of Fusion Energy Sciences, using the DIII-D National Fusion Facility, a DOE Office of Science user facility, under Award DE-FC02- 04ER54698.
